

INCOME VERIFICATION MATCH (IVM)

TECHNICAL MANUAL

Version 2.0

October 1994

Department of Veterans Affairs
VISTA System Design and Development

Revision History

Date	Description	Author
10/9/01	Added OBX segment to ORU~Z07 HL7 Message Definition in Appendix A	Karen Stella
10/9/01	Updated OBX segment in ORF~Z11 and ORU~Z11 HL7 Message Definitions in Appendix A	Karen Stella
10/9/01	Updated OBX Segment Table in Appendix B to include NTR data descriptions	Karen Stella
10/9/01	Added VA0052 and VA0053 to Supported/User-Defined Tables section in Appendix B	Karen Stella
10/19/01	Added OBX segment to ORF~Z07 HL7 Message Definition in Appendix A	Karen Stella
10/19/01	Added ORU/ORF~Z10 HL7 Message Definitions in Appendix A	Karen Stella
10/19/01	Added sequences 24 – 26 to ZMT segment table definition in appendix B	Karen Stella
10/19/01	Added sequences to 22 – 23 to ZIC Segment Table Definition in Appendix B	Karen Stella
10/19/01	Added sequences 6 – 13 to ZCD Segment Table Definition in Appendix B	Karen Stella
10/19/01	Added ZIV to Segment Table Definitions in Appendix B	Karen Stella
10/30/01	Added ORU/ORF to HL7 Message Events Table in Appendix A	Karen Stella
12/7/01	Added ORF~Z06 to HL7 Message Definitions in Appendix A	Karen Stella
12/7/01	Updated ZMT Segment Table in Appendix A	Karen Stella
12/7/01	Added Table VA0051 to Supported/User-Defined Tables section in Appendix B	Karen Stella
12/7/01	Updated Table VA15 in Supported/User-Defined Tables section in Appendix B	Karen Stella
12/7/01	Updated Table VA0035 in Supported/User-Defined Tables section in Appendix B	Karen Stella
1/2/2002	Updated Enrollment Trigger Events section in Appendix A	Kevin Louck, Bob Shetler
1/10/02	Added ZMH Segment Table to Segment Table Definitions in Appendix B	Brian Morgan
4/18/02	Changed narrative occurrences of HL7 V. 1.5 to reflect V. 1.6	Karen Stella
4/18/02	Corrected descriptions of ORU/ORF~Z10 to reflect that they are communications FROM HEC	Karen Stella
5/22/02	Updated date in footers	Karen Stella
5/23/02	Updated ZEL Segment Table in Appendix B	Karen Stella
5/23/02	Added PD1 Segment Table to Segment Table Definitions in Appendix B	Karen Stella
5/31/02	Updated ZMT Segment Table in Appendix B to reflect new test type	Karen Stella
10/1/02	Updated HL7 Message Definitions in Appendix A HL7 to support Address Indexing	Brian Morgan
10/7/02	Updated HL7 Segment Table Definitions in Appendix B to support Geographic Means Test and Address Indexing	Karen Stella
11/4/02	Updated HL7 Appendices B to support Geographic Means Test and Address Indexing	Karen Stella
11/5/02	Updated HL7 Appendices B to support Geographic Means Test and Address Indexing	Karen Stella
11/19/02	Added Sequence 34 to ZEL Segment Table Definitions in Appendix B to support Geographic Means Test and Address Indexing	Karen Stella
11/21/02	Added Appendix D – HL7 Flow Diagram	Karen Stella
2/11/03	Added Table VA0040 to Appendix D to support Enrollment Sub-Priority Group	Karen Stella
2/12/03	Updated Table VA0035 in Appendix D to support Enrollment Sub-Priority Group	Karen Stella
2/14/03	Updated Table VA 0004 in appendix D to include Purple Heart code	Brian Morgan/Karen Stella
3/3/03	Updated MSH Segment Table in Appendix B (IVM*2*69)	Eric Gustin,

		Karen Stella
3/4/03	Added FTI Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated PID Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated PD1 Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated ZIC Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated ZDP Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated ZIR Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated ZIV Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated ZMT Segment Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated HL7 Data Types Table in Appendix B (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated HL7 Message Definitions in Appendix A (IVM*2*69)	Eric Gustin, Karen Stella
3/4/03	Updated list of HL7 Segments in Appendix A (IVM*2*69)	Eric Gustin, Karen Stella
3/7/03	Updates per team feedback	Pat Wilson, Karen Stella

Introduction

Background

Public Law 101-508 permits the Department of Veterans Affairs (VA) to verify income data with the Internal Revenue Service (IRS) and Social Security Administration (SSA) for veterans receiving VA health care services whose eligibility for medical care is based on income. The income verification match process for Veterans Health Administration (VHA) medical facilities is centralized and performed at the Health Eligibility Center (HEC) in Atlanta, Georgia.

Functionality

IVM provides all of the functionality required to complete the eligibility verification process; electronically receive the revised VA Form 10-10F from the HEC; and automatically file the updated test in the **VISTA** Means Test module.

User Interactive Functions	Noninteractive Functions
<ul style="list-style-type: none">• View/verify patient demographic, insurance, and SSN information received from SSA and IRS• Upload verified data• View billing/collection and Means Test activity• Configure, monitor, and purge the IVM system	<ul style="list-style-type: none">• Exchange of data, on an ad hoc basis, between your facility and the HEC via electronic transmissions• Scheduled transmission to the HEC of all Means Tests meeting IVM criteria, as well as IVM-related billing and collections activity, via the <i>IVM Background Job</i> option <p><i>Note: Certain enrollment events, when they occur, are also sent to the HEC via the nightly background job.</i></p>

Related Manuals

IVM V. 2.0 User Manual

IVM V. 2.0 Release Notes

Integration

IVM V. 2.0 provides functionality that impacts Registration, Medical Care Cost Recovery (MCCR), and Information Resource Management (IRM) staff at your facility. It is highly integrated with the following packages:

Package Name	Integration
Patient Information Management System (PIMS)	<ul style="list-style-type: none"> • PIMS demographic, Means Test, enrollment, eligibility, and income information is sent to the HEC • Means Test and demographic information verified by the HEC is uploaded into PIMS files
Integrated Billing (IB)	IB provides billing and collections information, for billings resulting from IVM activity, that is transmitted back to the HEC and the Enrollment Database (EDB)
Health Level 7 (HL7)	Provides the foundation for all communications between your facility and the HEC

Implementation and Maintenance

There are three parameters included with the IVM software. These parameters, which can be edited through the IVM Parameter Enter/Edit option, control whether notification messages are sent to the IVM MESSAGES mail group when SSN, demographic, and insurance information is received from the HEC. If no entry is made, the default action is to generate the messages. This option may be used to deactivate the messages.

The background option *IVM Background Job* must be queued to run daily. It is recommended that it is run during nonpeak hours. The option will transmit the following information to the HEC: Means Test, patient demographic, eligibility, income test, insurance, enrollment, and IVM-related billing and collections.

All IVM notifications generated by the system are sent to the *IVM Messages* mail group. At a minimum, both the IRM Support Specialist and the IVM systems coordinator should be added as members of this group.

No data in the IVM files should be edited. This data is added and maintained automatically by the module.

Routines

Per VHA Directive 10-93-142 regarding security of software that affects financial systems, most of the IVM routines may not be modified. The third line of routines that may not be modified is so noted. The IVM output routines in the IVMR* namespace are exempt from this requirement.

Callable Routines

The IVM package has no supported callable routines.

Routines to Map

It is recommended that the following routines be mapped.

IVML*
IVMR*
IVMU*

Routine List

Take the following steps to obtain a list of routines in the IVM V. 2.0 software:

1. Programmer Options Menu
2. Routine Tools Menu
3. First Line Routine Print Option
4. Routine Selector: IVM*

Files

Globals to Journal

The IVM global is the only global used with the IVM software and it should be journaled.

File List

Per VHA Directive 10-93-142 regarding security of software that affects financial systems, the IVM Data Dictionaries may not be modified. The file descriptions of these files are so noted.

File Number	File Name	Global
301.5	IVM PATIENT	^IVM(301.5)
301.6	IVM TRANSMISSION LOG	^IVM(301.6)
301.61	IVM BILLING TRANSMISSION	^IVM(301.61)
301.63	IVM EXTRACT MANAGEMENT	^IVM(301.63)
301.9	IVM SITE PARAMETER	^IVM(301.9)
301.91*	IVM REASONS FOR NOT UPLOADING INSURANCE	^IVM(301.91)
301.92*	IVM DEMOGRAPHIC UPLOAD FIELDS	^IVM(301.92)
301.93*	IVM CASE CLOSURE REASON	^IVM(301.93)

*File comes with data

Take the following steps to obtain information about the files and templates in the IVM software:

File Flow (Relationships between files)

1. VA FileMan Menu
2. Data Dictionary Utilities Menu
3. List File Attributes Option
4. Enter File # or range of File #s
5. Select Listing Format: Standard
6. You will see what files point to the selected file. To see what files the selected file points to, look for fields that say “POINTER TO”.

Templates

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File:
 - Print Template
 - Sort Template
 - Input Template
 - List Template
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Options

Take the following are the steps to obtain information about menus, exported protocols, exported options, and exported remote procedures relating to the IVM package.

Menu Diagram

1. Programmers Options
2. Menu Management Menu
3. Display Menus and Options Menu
4. Diagram Menus
5. Select User or Option Name: O.IVM MAIN MENU

Exported Protocols

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: PROTOCOL
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Options

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: OPTION
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Remote Procedures

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: REMOTE PROCEDURE
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Archiving and Purging

Archiving

There are no archiving capabilities included with the IVM software.

Purging

The Purge IVM Transmissions option allows IRM to purge entries from the IVM TRANSMISSION LOG file (#301.6) which are associated with closed cases (entries in the IVM PATIENT file (#301.5)) from the previous Means Test year).

Package-wide Variables

There are no package-wide variables associated with the IVM software package.

SACC Exemptions/Non-Standard Code

There are no SACC Exemptions associated with the IVM software package.

External/Internal Relations

External Relations

The following **VISTA** package versions (or higher) MUST be installed PRIOR to loading this version of IVM.

Kernel	V. 7.1
VA FileMan	V. 20.0
PIMS	V. 5.3
Integrated Billing	V. 2.0
OERR	V. 2.5
VISTA HL7	V. 1.6

DBIA Agreements

Take the following steps to obtain database integration agreements for the IVM package.

Custodial Package	Subscriber Package
1. FORUM 2. DBA MENU 3. Integration Agreement Menu Custodial Package Menu 4. Active by Custodial Package Option 5. Select Package Name: IVM	1. Forum 2. DBA MENU 3. Integration Agreement Menu 4. Subscriber Package Menu 5. Print Active by Subscriber Package Option 6. Start with subscriber package: IVM

Internal Relations

All of the IVM V. 2.0 package options have been designed to stand alone.

Security

Security Management

Public Law 101-508 permits the Department of Veterans Affairs (VA) to verify income data with the Internal Revenue Service (IRS) and Social Security Administration (SSA) for veterans receiving VA health care services whose eligibility for medical care is based on income. The IVM process for Veterans Health Administration (VHA) medical facilities is centralized and performed at the HEC in Atlanta, Georgia.

Per VHA Directive 10-93-142 regarding security of software that affects financial systems and central data bases, IVM routines may not be modified with the following exception: IVMR* - IVM Reports. In compliance with this same directive, the IVM Data Dictionaries may not be modified.

Security Keys

Take the following steps to obtain information about the security keys contained in the IVM software:

1. VA FileMan Menu
2. Print File Entries
3. Output From What File: Security Key
4. Sort By: Name
5. Start With Name: First// IVM
6. Go To Name: Last// IVMZ
7. Within Name, Sort By: <RET>
8. First Print Field: Name
9. Then Print Field: Description

VA FileMan Access Codes

The following is a list of recommended VA FileMan access codes for the files in the IVM software.

File Number	File Name	DD Access	RD Access	WR Access	DEL Access	LAYGO Access
301.5	IVM PATIENT	@		@	@	@
301.6	IVM TRANSMISSION LOG	@		@	@	@
301.61	IVM BILLING TRANSMISSION	@		@	@	@
301.63	IVM EXTRACT MANAGEMENT	@		@	@	@
301.9	IVM SITE PARAMETER	@		@	@	@
301.91	IVM REASONS FOR NOT UPLOADING INSURANCE	@		@	@	@
301.92	IVM DEMOGRAPHIC UPLOAD FIELDS	@		@	@	@
301.93	IVM CASE CLOSURE REASON	@		@	@	@

How to Generate On-line Documentation

This section describes some of the various methods by which users may secure IVM technical documentation. On-line technical documentation pertaining to the IVM software, in addition to that which is located in the help prompts, may be generated through utilization of several Kernel options, including those listed in this section. Refer to the **VISTA** Kernel Reference Manual for further information about other utilities which supply on-line technical documentation.

Xindex

This option analyzes the structure of a routine(s) to determine in part if the routine(s) adheres to **VISTA** Programming Standards. The XINDEX output may include the following components: compiled list of errors and warnings, routine listing, local variables, global variables, naked globals, label references, and external references. By running XINDEX for a specified set of routines, the user might discover any deviations from **VISTA** Programming Standards which exist in the selected routine(s) and see how routines interact with one another, that is, which routines call or are called by other routines.

To run XINDEX for the IVM package, specify the IVM namespace at the "routine(s) ?>" prompt. IVM initialization routines which reside in the UCI in which XINDEX is being run, as well as local routines found within the IVM namespace, should be omitted at the "routine(s)?>" prompt. To omit routines from selection, preface the namespace with a minus sign (-).

List File Attributes

This VA FileMan option allows the user to generate documentation pertaining to files and file structure. Using this option via the "Standard" format will yield the following data dictionary information for a specified file(s): file name and description, identifiers, cross-references, files pointed to by the file specified, files which point to the file specified, input templates, print templates, and sort templates. In addition, the following applicable data is supplied for each field in the file: field name, number, title, global location, description, help prompt, cross-reference(s), input transform, date last edited, and notes.

Using the "Global Map" format of this option generates an output which lists all cross-references for the file selected, global location of each field in the file, input templates, print templates, and sort templates, when applicable. For a comprehensive list of IVM files, please refer to the FILES section of this manual.

Glossary

This glossary contains terms and their definitions as they relate to the IVM package.

Category A veteran	A patient who, as a result of Means Testing, is in the mandatory category in regard to eligibility for VA care.
Category C veteran	A patient who, as a result of Means Testing, is in the discretionary category in regard to eligibility for VA care.
Full Data Transmission	A complete information profile transmitted to the HEC containing patient demographic, eligibility, Means Test, income, insurance, and enrollment information.
HEC	Health Eligibility Center (formerly IVM Center)
HL7	Health Level 7 is an interface specification designed to standardize the way in which health care information is transferred between systems. IVM utilizes the VISTA HL7 package to assist in transporting data using this specification.
IRS	Internal Revenue Service
IVM	Income Verification Match. A program designed to verify income and insurance data reported by the veteran with that received from IRS (Internal Revenue Service), SSA (Social Security Administration), and other sources.

Means Test	Eligibility for VA hospital care and nursing home care is divided into two categories - mandatory and discretionary. An income assessment is made to determine whether a non service-connected veteran, who is not in receipt of VA monetary benefits or otherwise exempt from income assessment, is eligible for cost-free VA medical care. This income assessment is known as "Means Testing". Patients whose income is above the defined income levels must agree to make copayments to VA for outpatient and inpatient care rendered.
SSA	Social Security Administration
Suggested SSN	Patient or spouse SSNs returned from SSA as possible matches based on name, sex, and date of birth. These SSNs will be validated by the HEC before being returned to the field facilities.
Third Party Claim	When a party other than the patient, such as an insurance company, is billed.

Appendix A - IVM Data Transmissions

Basic knowledge of the HL7 protocol is assumed and the information contained in the HL7 protocol will not be repeated *here*. Further information concerning the HL7 protocol may be found in the HL7 Interface Standards V. 2.1.

Purpose

This document specifies the purpose of the interface between the **VISTA** IVM package and the HEC (non-**VISTA**) system based on the HL7 protocol. It is intended that this interface form the basis for exchange of healthcare information between the **VISTA** IVM package and the HEC system.

Scope

This document describes the messages that are exchanged between the **VISTA** IVM package and the HEC (non-**VISTA**) system for the purpose of exchanging income test, demographic, insurance, and enrollment information.

General

This application uses the abstract message approach and encoding rules specified by HL7. HL7 is used for communicating data associated with various events that occur in healthcare environments. For example, when a Means Test is added in **VISTA**, the event will trigger a Full Data Transmission message to the HEC.

Communications Protocol

HL7 V. 1.6 of the VA MailMan lower level protocol (LLP) will be used to transmit HL7 messages between the local site and the HEC.

Background Messages

On a daily basis, the data associated with various events that occur in **VISTA** will be transmitted to the HEC. The IVM Background Job option will be used to transmit a HL7 unsolicited Full Data Transmission for each **VISTA** event occurring that day.

Batch Messages

All HL7 unsolicited messages sent from the **VISTA** IVM application and received from the HEC (non-**VISTA**) system will be in a batch format. Each batch will contain 1-100 messages/records per batch.

HL7 Message Event Types

IVM V. 2.0 supports the receipt and transmission of the following HL7 message event types (data transmissions).

HL7 Transmission Name	HL7 MESSAGE TYPE	HL7 Event Code
SSN Data Transmission	ORU	Z03
Insurance Data Transmission	ORU	Z04
Follow-up Data Transmission	ORU	Z04
Demographic Data Transmission	ORU	Z05
Means Test Data Transmission	ORF/ORU	Z06
Full Data Transmission	ORF/ORU	Z07
Case Status Data Transmission	ORU	Z08
Billing/Collection Data Transmission	ORU	Z09
Income Test Data Transmission	ORU/ORF	Z10
Enrollment/Eligibility Data Transmission	ORF/ORU	Z11
VISTA – Initiated Enrollment/Eligibility Query Transmission	QRY	QRY
IVM – Initiated Query Transmission	QRY	QRY

HL7 Message Segments

IVM V.2.0 utilizes the following HL7 segments to support the exchange of patient data.

Segment ID	Segment Name
FT1	Financial Segment
IN1	Insurance Segment
LOC	Location Identification Segment
MFE	Master File Entry Segment
MFI	Master File Identification Segment
MSH	Message Header
NTE	Notes And Comments Segment
OBX	Observation/Result Segment
PD1	Patient Demographic 1 Screen
PID	Patient Identification Segment
QRD	Query Definition Segment
QRF	Query Filter Segment
RF1	Referral Information Segment
ZBT	VA-Specific Beneficiary Travel Segment
ZCD	VA-Specific Catastrophic Disability Segment
ZCT	VA-Specific Emergency Contact Segment
ZDP	VA-Specific Patient Dependent Information Segment
ZEL	VA-Specific Patient Eligibility Segment
ZEM	VA-Specific Employment Information Segment
ZEN	VA-Specific Enrollment Segment
ZFE	VA-Specific Fee Basis Segment
ZGD	VA-Specific Guardian Segment
ZIC	VA-Specific Income Segment
ZIE	VA-Specific Patient Ineligible Segment
ZIO	VA-Specific Inpatient/Outpatient Information Segment
ZIR	VA-Specific Income Relation Segment
ZIV	VA-Specific Message Processing Segment
ZMT	VA-Specific Means Test/Copay Test Information Segment
ZPD	VA-Specific Patient Information Segment
ZRD	VA-Specific Rated Disabilities Segment
ZSP	VA-Specific Service Period Segment
ZTA	VA-Specific Temporary Address Segment

HL7 Message Definitions

In this section, the following elements will be defined for each HL7 message.

- Message Type
- Message Event Code
- Abstract Message Syntax (list of segments used in the message)
- List of Data Fields (sequence numbers used for each segment)

An HL7 message is composed of individual HL7 segments. Each individual segment contains logical groupings of data. The Braces { } indicate one or more repetitions of the enclosed group of segments. The Brackets [] indicate that a segment may be optional. For each message, there will be a list of HL7 standard segments or VA-specific "Z" segments used in the message. The data fields (represented by sequence numbers) utilized in each segment will also be specified. The HL7 Transmission/Event Type Codes are annotated beside each message type.

Please note that an ORF transmission contains the MSA and QRD segments, but the ORU transmission does not.

SSN Data Transmission - (ORU~Z03)

The SSN data transmission transmits new veteran or spouse social security numbers to your facility from the HEC.

```
BHS    Batch Header Segment
{MSH    Message Header
PID    Patient Identification Segment (SEQ 1,3,5,7,19)
ZIV    VA-Specific Message Processing Segment (SEQ 1-7,12)
}
BTS    Batch Trailer
```

Insurance Data Transmission - (ORU~Z04)

The insurance data transmission transmits patient insurance information to your facility from HEC.

```
BHS    Batch Header

Trigger Events Implemented via Routine Hook

Routine Name	API Call (Hook)	Description
DGNTAPI	FILENTR^DGNTAPI	Call to create a new NTR HISTORY FILE (#28.11) entry. Will also queue HL7 message for HEC database updates.
DGRPEIS2	LOGDCD^IVMCUC	Routine hook will monitor changes to the fields contained on Screen #9 (Income Screening Data) of the Registration module.

Appendix B - HL7 Segment Table Definitions

For each HL7 segment, the data elements contained in the segment are described in table format. These tables are described in the following sections. The abbreviated column headings contained in the tables and associated HL7 data types are also defined.

HL7 Abbreviated Column Headings

Column Heading	Definition
SEQ	Sequence of data element in segment
LEN	Maximum length of data element
DT	Data Type
R/O	Required/Optional (R = Required, blank = Optional)
RP/#	Repeats/Maximum number of repetitions (Y for repeats)
TBL#	Number of corresponding HL7 user defined/supported table

HL7 Data Types

Data Type	Definition	VA FileMan Data Type
AD	Address	Free Text
CE	Coded Element	Set of Codes or Pointer
CK	Check Digit	No Equivalent
CM	Composite	No Equivalent
CP	Composite Price	Free Text
CX	Extended Composite ID with Check Digit	Set of Codes or Pointer
DLN	Drivers License Number	No Equivalent
DT	Date	Date Only
EI	Entity Identifier	Set of Codes or Pointer
FT	Formatted Text Data	No Equivalent
HD	Hierachic Designator	No Equivalent
ID	Coded Value	Set of Codes or Pointer
IS	Coded Value for user-defined tables	Set of Codes or Pointer
NM	Numeric	Numeric
PN	Person Name	Free Text
PT	Processing Type	No Equivalent
SI	Sequence ID	Numeric
ST	String	Free Text
TM	Time	Time Only
TN	Telephone Number	Free Text
TS	Time Stamp	Date/Time
TX	Text	Word processing
XCN	Extended Composite ID Number and Name for Persons	No Equivalent
XON	Extended Composite Name and Identification Number for Organizations	No Equivalent
XPN	Extended Person Name	No Equivalent
XTN	Extended Telecommunication Number	No Equivalent

29	80	FT				Hardship Reason	HARDSHIP REASON Field (#2.09)

Notes:

- * Deletion of a Test: SEQ 1 indicates the type of test to delete.
SEQ 2 will be used to indicate which income year test to delete. The income year is the year prior to the date of the means test.
SEQ 3 = HLQ will indicate that the test should be deleted.
- ** Deletion of a Hardship Determination:
SEQ 24 = HLQ will indicate that the hardship determination should be deleted.
SEQ 2 will be used to indicate for which income year to delete the hardship determination . The income year is the year prior to the date of the means test.
- *** Means Test Signature Indicator
SEQ 27 was added by Patch IVMB*2*600 for the Implement Signed Means Test Strategy project. VAMCs receive and store data from SEQ 27, but do not include this sequence in transmissions to the HEC. VAMCs send means test signature images to the HEC via FAX. HEC staff processes those images using commercial software with updates to the HEC database via custom remote procedure calls (RPCs).

VA-Specific Patient Information Segment (ZPD)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	VISTA Element Name PATIENT (#2) File Field or Expression

VA-Specific Rated Disabilities Segment (ZRD)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	VISTA Element Name PATIENT (#2.3721) Sub-File Field or Expression
1	4	SI	R			Set ID	Sequential Number
2	4	CE				Disability Condition *(See below.)	RATED DISABILITIES (VA) field (#.01)
3	3	NM				Disability %	DISABILITY % field (#2)
4	1	IS			VA01	Service Connected Rated Disability	SERVICE CONNECTED field (#3)

* DISABILITY CONDITION has the coded element data type, which is one of the composite data types. The ‘~’ is always used within the IVM and Enrollment packages as the component separator. The general format for the coded element data type, from the 2.3 version of the HL7 standard, is:

```
<identifier (ST)>~<text (ST)>~<name of coding system (ST)>~<alternate identifier (ST)>~
```

The actual format for the DISABILITY CONDITION is:

```
<4-digit DX CODE from the Disability Condition file (#31)>~<45 character NAME field from the  
Disability Condition file>
```

If the DISABILITY CONDITION field is included in the segment than both of its components are required.

Here is an example of the ZRD segment: **ZRD^1^5001~BONE DISEASE^30^1**

Table VA013 - Rated DisabilitiesNUMBER (.001) Field [internal entry number] of the DISABILITY CONDITION (#31) File
(*Sample listing of possible values*)

Value	Description
1	OSTEOMYELITIS
2	BONE DISEASE
3	RHEUMATOID ARTHRITIS
4	DEGENERATIVE ARTHRITIS
5	ARTHRITIS

Table VA014 - Medication Copayment Exemption Status

Value	Description
0	NON-EXEMPT
1	EXEMPT

Table VA015 - Enrollment Status

(#.04) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Unverified
2	Verified
3	Inactive (not used at this time)
4	Rejected (not used at this time)
5	Suspended (not used at this time)
6	Deceased
7	Canceled/Declined
8	Expired (not used at this time)
9	Pending (not used at this time)
10	Not Eligible
11	Rejected; Fiscal Year
12	Rejected; Mid-cycle
13	Rejected; Stop New Enrollments
14	Rejected; Initial Application by VAMC
15	Pending; No Eligibility Code in VIVA
16	Pending; Means Test Required
17	Pending; Eligibility Status is Unverified
18	Pending; Other
19	Not Eligible; Refused to Pay Copay
20	Not Eligible; Ineligible Date
21	Pending; Purple Heart Unconfirmed
22	Rejected; Below Enrollment Group Threshold

Table VA016 - Reason Enrollment Canceled/Declined

(#.05) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Dissatisfied with Care
2	Geographic Access
3	Other Insurance
4	Other

Table VA021 - Enrollment Priority

(#.07) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Priority 1
2	Priority 2
3	Priority 3
4	Priority 4
5	Priority 5
6	Priority 6
7	Priority 7
8	Priority 8

Table VA0033 - Fee Basis Treatment Code Type

Value
Short Term Fee Status
Home Nursing Services
For I.D. Card Status
State Home

Table VA0034 - Fee Basis Program

Value
CHAMPVA
Civil Hospital
Comp & Pension
Contract Halfway House
Contract Nursing Home
Contract Readjustment Counseling
Dental
Dialysis
Home Health Services
Inpatient
Other Institutional Services
Outpatient
Oxygen Services
Pharmacy
State Home

Table VA0035 - Enrollment Sub-Group

Enrollment Sub-Group (.12) of Patient Enrollment file (#27.11)

Value	Description
a	Non-compensable zero percent service connected veterans who were in an enrolled status on a specified date and who have remained continuously enrolled thereafter
c	Non-service connected veterans who were in an enrolled status on a specified date and who have remained continuously enrolled thereafter
e	0% non-compensable service-connected veterans who apply for enrollment on or after the EGT effective date
g	Non-service-connected veterans who apply for enrollment on or after the EGT effective date

Table VA0040 - Enrollment Group Threshold Type

EGT Type (.04) of Enrollment Group Threshold file (#27.16)

Value	Description
1	ANNUAL FISCAL YEAR
2	STOP NEW ENROLLMENTS DURING CYCLE
3	MID-CYCLE CHANGE
4	ENROLLMENT DECISION

Table VA0051 - Means Test Signature Status

Value	Description
1	YES; Means Test image received and signed
0	NO; Means Test image received, but unsigned
9	DELETED; Means Test signature indicator has been deleted

Table VA0052 - NTR Verification Method

Value	Description
S	Qual Military Srvc (Qualifying Military Service)
M	Military Med Rec (Military Medical Record)
N	Not Qualified

Table VA0053 - NTR Qualifiers

Value	Description
1	Received NTR Trmt (Received NTR Treatment)
2	Aviator Pre 1955 (Aviator Prior to 1955)
3	Sub Trainee pre 1965 (Navy Sub Trainee Prior 1965)
4	Dx With Head Neck Cancer (Diagnosed With Head and Neck Cancer)
5	No NTR Trmt (No NTR Treatment)
6	Not Aviator Pre 1955 (Not Aviator Prior to 1955)
7	Not Sub Trainee pre 1965 (Not Navy Sub Trainee Prior 1965)
8	Not Dx With Head Neck Cancer (Not Diagnosed With Head and Neck Cancer)
9	NTR Trmt Unknown (NTR Treatment Unknown)

Table VA061 – Invalid Address Reason

Value	Description
1	Address Does Not Exist (maps to Code 1 errors)
2	Veteran Does Not Reside at Address (maps to NCOA invalid address and mail returned by USPS due to Forwarding Order Expired, etc.)
3	Missing Required Address Field (maps to HEC Errors/AAC Errors)
4	Death
5	Other

Table VA0115 - Servicing Facility*(Sample listing of possible values)*

Value	Description
512 9AC	Perry Point (Nursing Home)
